

TIPOLOGIE DI NASTRI ADESIVI

TYPES OF ADHESIVE TAPES

TYPES DE RUBANS ADHÉSIFS

V2800

Approvato dal primo equipaggiamento da più di 25 anni
Tape approved by OEMs for more than 25 years

Materiale in schiuma di poliuretano con adesivo acrilico ad alta prestazione su entrambi i lati

- Approvato dal primo equipaggiamento da più di 25 anni
- Progettato per dare le migliori prestazioni in termini di resistenza alla trazione
- Adesivo acrilico ad alte prestazioni che fornisce un'adesione forte e di lunga durata
- Temperatura di servizio -40°C / +100°C
- Temperatura di applicazione: min. 15°C

Polyurethane foam core with high-performance acrylic adhesive on both sides

- Industry approved by OEMs for more than 25 years
- Designed to have the best performance in shear resistance and mismatch
- High performance, durable acrylic adhesive provides a strong, long-lasting bond.
- Service temperature -40°C / +100°C
- Application temperature: min. 15°C

V3030

Appositamente progettato per l'utilizzo in condizioni estreme
Specifically designed to meet the harsh requirements of aftermarket wheel weights

- Alta adesione e resistenza
- Si attacca rapidamente al cerchio con una preparazione minima della superficie
- Alta tenuta in condizioni non ideali (temperature estreme e superfici sporche)
- Aderisce ai cerchi freddi, nei cambi gomme nei mesi invernali
- Temperatura di servizio -40°C / +50°C
- Temperatura di applicazione: fino a circa -10°C

- High tack & dynamic shear.
- Sticks faster to rim surfaces with minimum preparation of surface.
- The adhesive and foam tape system improves bonding under wide range of weather & rim conditions.
- Sticks to cold rims critical for those tyre changes in winter months.
- Conformable foam core which allows the adhesive tape to fill in the gaps in uneven rim surfaces, giving better bond strength.
- Service temperature -40° C / +50°C
- Application temperature: down to approx -10°C

V3030 FINGER LIFT

Liner 3mm extra per una rimozione veloce ed una rapida bilanciatura
3mm Extra liner for fast peeling and quick balancing

- Rimozione facilitata grazie al liner che eccede la sagoma del peso
- Alta adesione e resistenza
- Si attacca rapidamente al cerchio con una preparazione minima della superficie
- Alta tenuta in condizioni non ideali (temperature estreme e superfici sporche)
- Aderisce ai cerchi freddi, nei cambi gomme nei mesi invernali
- Temperatura di servizio -40°C / +50°C
- Temperatura di applicazione: fino a circa -10°C

- *Fast peeling thanks to extraliner*
- *High tack & dynamic shear.*
- *Sticks faster to rim surfaces with minimum preparation of surface.*
- *The adhesive and foam tape system improves bonding under wide range of weather & rim conditions.*
- *Sticks to cold rims critical for those tyre changes in winter months.*
- *Conformable foam core which allows the adhesive tape to fill in the gaps in uneven rim surfaces, giving better bond strength.*
- *Service temperature -40° C / +50°C*
- *Application temperature: -10°C*

V3030R XTR

La nuova soluzione di riferimento per i gommisti: nessun residuo di adesivo
The new benchmark solution for Tyre Fitters: no foam residue

- Tecnologia "Clean peel"
- Nessun residuo di schiuma alla rimozione dei pesi
- Alta adesione e resistenza
- Si attacca più rapidamente alle superfici dei cerchi con una preparazione minima della superficie
- Aderisce ai cerchi freddi, nei cambi gomme nei mesi invernali
- Temperatura di servizio -40°C / +50°C
- Temperatura di applicazione: fino a circa -10°C

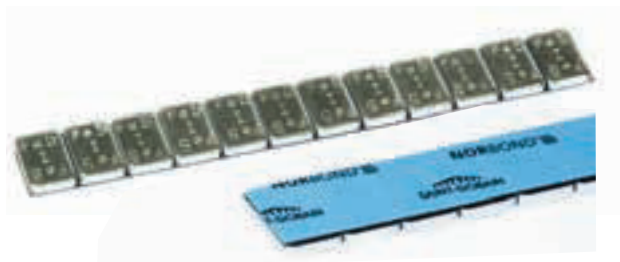

- "Clean peel" technology.
- No foam residue when removing weights.
- High tack & dynamic shear.
- Sticks faster to rim surfaces with minimum preparation of surface.
- Sticks to cold rims critical for those tyre changes in winter months.
- Service temperature -40° C / +50°C
- Application temperature: down to approx. 10°C
